(54) ORGANIC ELECTROLUMINESCENT ELEMENT

(57) Abstract:

PROBLEM TO BE SOLVED: To achieve a highly efficient organic electroluminescent element excellent in driving durability by improving an organic material used in the organic electroluminescent element.

SOLUTION: A material represented by general formula (1) is used as a constituent material of at least one organic layer in the organic electroluminescent element having a pair of electrodes and at least one organic layer sandwiched therebetween.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
